

GENESIS

The Evolution of Pipeline Trailers

secoronline.com

MANUFACTURING PROCESS

GENESIS TRAILERS are the creation of a pipeliner, made for pipeliners. Each trailer is individually fabricated by experienced machinists who carry on a 55 year tradition. But these aren't your old school towables. We start with plasma cut parts from the highest grade virgin steel. Our frames are welded from heavy duty C-Channel to make them tougher than any other. We then coat it all prior to assembly with industrial epoxy paint for maximum scratch and corrosion resistance. At **GENESIS** we take great pride in our attention to detail, unparalleled innovation, and commitment to excellence.

WE THOUGHT OF EVERYTHING, AND THEN SOME.

GENESIS HDC-102 SPOOL TRAILER

5" Tail roller with 1.5" greasable bearings for easy spool loading

8" Poly support castors rated at 1800 pounds each for smooth spool rolling

3200 pound two speed winch provides the strength you need for the heaviest loads

102" spool can handle up to 1000 feet of 4" poly

7200 pound torque axle eliminates torque springs and provides maximum clearance

Fully adjustable hitch fits any vehicle or ride height
