

SOCKET TOOLING KITS

Socket Fusion Capability for 1/2" CTS to 4" IPS (16mm — 125mm)

OVERVIEW

McElroy Socket Tooling is perfect for installing fittings and allows you the ability to socket fuse 1/2" CTS to 4" IPS (16mm to 125mm) pipe.

With McElroy's Socket Tooling Kits, you can locate and identify a specific range of socket tooling equipment that fits your needs, instead of ordering each piece separately. All of the included equipment conveniently fits in a specially designed tool box and tray to keep all of your socket tooling in one place.

FEATURES

- Multi-Mc™ Heater is microprocessor controlled
- Compact and lightweight
- Hand-operated

KIT COMPONENTS

All kits include heater, heater adapters, tubing shears/cutters, chamfer tools/depth gauges, screw/driver kit and cold ring tools. Other inclusions dependent on specifications of each Socket Tooling Kit.

Multi-Mc™ Heater: Heater that features microprocessor control with a dial thermometer to monitor temperature.

Heater Adapter Set: Heater Adapters are used to heat pipe and fitting. All adapters have an anti-stick coating.

Chamfer Tool/Depth Gauge: Chamfer tool is used to put the required amount of chamfer on the end of the pipe. The tool is then used as a depth gauge.

Cold Ring Tool: The Cold Ring Tool is used with the depth gauge to clamp onto the pipe at the proper depth. The tools also rounds and holds the pipe to be fused.
