

Georg Fischer's FSEQ Peeler

- Fully concentric design so it doesn't egg the pipe as it scrapes.
- Thin width design to help with coiled pipe.
- Fully floating blade with some oscillation to help deal with slightly imperfect pipe.
- Sealed stainless bearings to protect the pipe, increase the durability of the peeler, and reduce the effort needed to scrape.
- Quick close spring loaded closure design to ensure proper pressure on the pipe.
- Ergonomic grips to reduce fatigue on operator.
- Carbide blade with depth guides on both sides of the angled blade to provide even blade wear, extend the life of the blade, and reduce drag to ease effort needed.
- Comes with a protective case to help maintain the tool in good working order.
- High quality, made by GF, field tested in Europe for approx. 8yrs before being introduced to the American market.

Size	Part Number
1-1/4"	10014409
1-1/2"	10014410
2"	10014411
3"	10014412
4"	10014413
6"	10014414
8"	10014415
10"	10014416
12"	10014417
