

MEGAMc® ROLLERS

Pipe-Handling Equipment for 12" IPS — 54" IPS pipe (340mm — 1400mm)

OVERVIEW

McElroy's **MegaMc® Roller** is a productivity tool that keeps pipe off the ground as it is being fused and pulled along the right of way. The rollers are designed for 12" IPS through 54" IPS (340mm to 1400mm) pipe.

McElroy designed the MegaMcRollers to be tip resistant while handling a capacity of 9,000 pounds per unit. The rollers can be paired with other productivity tools on a job site, including the MegaMc PolyHorse® and MegaMc Pipe Stands in order to boost jobsite workflow.

The pipe and pipe joints roll through the rollers easily. By keeping the pipe off the ground, the pipe is protected from the damage of being pulled on the ground, as well as excessive pulling forces. The Large Diameter Low Profile Rollers are stackable, with the ability to transport 52 rollers on a flatbed semi trailer.

FEATURES

- Minimizes drag on the pipe
- Keeps pipe clean and off the ground
- Sealed ball-bearing construction
- Tip-resistant
- Minimizes pipe damage
- Stackable to transport 52 rollers on semi trailer
- Easily lifted with chain, straps or forks

SPECIFICATIONS

MODELS

4842401:..... Large Diameter Low Profile Roller Set

CAPACITY

Pipe Sizes:..... 12" IPS to 54" IPS pipe (340mm to 1400mm)

Roller:..... 9,000 lbs. (4,802.3 Kg) per roller

WEIGHT

Roller:..... 382 lbs. (173.3 Kg) per roller

UNIT DIMENSIONS

Height:..... 25" (635mm)

Width:..... 66.7" (1,693mm)

Depth:..... 36" (914mm)
