TRACSTAR[®] 630 Series 2

Fusion Capability for 8" IPS to 24" OD (225mm to 630mm)

OVERVIEW

McElroy's **TracStar® 630 Series 2** is a self-propelled, all-terrain fusion machine capable of butt fusing pipe from 8" IPS to 24" OD (225mm to 630mm). The self-contained machine eliminates the need for a separate power source on the jobsite. An on-board generator powers the heater while powerful hydraulics assist all fusion functions, including the operation of the jaws, pipe lifts and facer.

Models are available with advanced emission control technology that meets the EPA's latest Tier 4 standards, without the need for diesel exhaust fluid (DEF). Updates include improved hydraulic and electrical systems and a new cowling design that provides easy access when maintenance is required and a softer-running engine.

The TracStar 630 Series 2 is also available as an Auto unit that controls and monitors the heat, soak, fuse and cool cycles.

FEATURES

- Patented Centerline Guidance System for equal distribution of force around the joint
- ISO-compliant industrial Teflon-coated heater plates
- Advanced blade design for smooth face and long life
- DataLogger[®] compatible
- Removable 3- or 4-jaw carriage for in-ditch use
- Dual hydraulic pipe lifts aid in loading and unloading pipe
- Serrated jaws and inserts keep pipe from slipping during fusion
- Hydraulic pivoting heater and facer
- Wireless remote driving control
- Dual-speed tracks
- Redesigned cowling allows easy access for machine maintenance
- Remote engine stop/start capabilities

INCLUSIONS

The TracStar 630 Series 2 includes fusion machine, facer, heater, remote control with rechargeable batteries, 24" OD butt fusion inserts and lifting assembly. Optional in-ditch hose kit and heater/facer stand sold separately. Specifications subject to change without notice.
